

INDESIGN® CS3 EXTENSIBLE BY DESIGN

Adobe InDesign software provides third-party developers with unprecedented power, enabling them to create plug-ins that can be integrated seamlessly into the application. In fact, all of its type, color, printing, and other features are provided through plug-ins to this core application. Virtually every aspect of the program is a plug-in, giving third-party developers extraordinary freedom in customizing InDesign and adding functionality.

CopyFlow Gold (CFG)

CopyFlow Gold (CFG) adds powerful page assembly capabilities to Adobe InDesign CS2 and CS3. Once installed on a Macintosh or Windows machine, CFG provides menu selections which let users import and export as many boxes of text as they wish at the same time with a simple mouse click. These automated processing features make using InDesign faster and more productive than ever to meet the increasingly sophisticated needs of publishing professionals in both low-volume and high-volume environments.

Key features include:

- Batch import and export of text in a variety of formats, including tagged text and RTF.
- Retention of formatting during the round trip.
- Ideal for translators who wish to export text in one language from an InDesign document and then re-import the translated text in another language into the same document.

CopyFlow Gold has thousands of satisfied users world-wide in the translation, magazine, book, and newspaper industries.

North
Atlantic
Publishing
Systems, Inc.

North Atlantic Publishing Systems (NAPS) has been developing desktop productivity solutions for publishers and translators for the past 18 years. NAPS products have been used by major customers for workflow management, editorial systems integration, and XML conversion. NAPS solutions are cross-platform and application-independent. They are designed to help users maximize their investment in industry-standard packages such as Adobe InDesign and to increase the efficiency of their workflow. NAPS also develops custom JavaScripts for InDesign users.
